

Finger Joint Cutters

Using a newly developed advanced manufacturing technique, WKW Finger Joint Cutters will produce unmatched production results for you.

Quick Delivery Cutterheads

Thousands of Quick Delivery Cutterheads are available. Quick Delivery means cutterheads are shipped in 7-10 working days.

BAK-PAK® & EURO BAK-PAK™

Two highly unique carbide knife systems designed to give you higher performance, longer tool life, increased production and tremendous savings.

Router Bits

A broad line of premium router bits gives customers a wide spectrum of tools to choose from.

Knife Steel

Absolutely the most extensive Knife Steel line in the industry. Superior edge finishes, uniform thickness, consistent hardness and comprehensive knowledge and engineering support.

Tooling That Makes A Difference...

With 80 years of woodworking experience, from application to application, Wisconsin Knife Works has supplied thousands of woodworking plants with tooling that can outperform anything else on the market. You see as the "Engineers To The Woodworking Industry" we're focused on your application and production requirements. It's our goal to help you produce the best quality products over and over again. We want to exceed your expectations with tooling that makes a noticeable difference in your daily production.

...On the Production Floor From Wisconsin Knife Works

We specialize in manufacturing premium cutting tools for your woodworking applications that include solid wood and man-made materials. WKW has the right tooling for the job.

We invite you to try premium cutting tools from Wisconsin Knife Works and experience the difference 80 years of tooling design and manufacturing experience can make in your application. We will exceed your expectations.

A Full Line of Premium Cutting Tools

BAK-PAK® & EURO BAK-PAK™

The BAK-PAK® and EURO BAK-PAK™ Carbide Knife Systems each feature a two-piece matching system that incorporates the best grade of micrograin carbide on the market polished to a mirror finish and a matching high-speed steel corrugated backing plate. These premium knife systems will outperform, out-cut, and out-produce any competing carbide knife system anywhere. These knives are extremely simple to sharpen and maintain, improving production levels.

ROUTER BITS

Wisconsin Knife Works' router bits have been designed and manufactured to achieve optimum feed rates, precision tolerances and superior finishes, with consistent repeatability run-to-run, bit-to-bit. WKW offers nearly one thousand standard router bits. In addition, custom router bits can be manufactured for your specific application. High speed steel, carbide tipped and solid carbide tools are available.

KNIFE STEEL

Wisconsin Knife Works knows it takes the best raw material to produce premium knife steel, but WKW goes above and beyond by adding over 80 years of engineering expertise and manufacturing experience. You can count on WKW knife steel to provide consistent hardness for easy grinding, superior edges for long runs and uniform thickness for improved balance and reduced set-up time. Knives include, M-2 and M-3 High Speed Steel, Solid Carbide, AKM, Karbo Krome D-2, Opti, Badger and the BAK-PAK® and EURO BAK-PAK™ Carbide Knife Systems.

QUICK DELIVERY CUTTERHEADS

The Quick Delivery Cutterhead Program has reduced delivery times on thousands of cutterhead styles to just days. Wisconsin Knife Works has developed a proprietary manufacturing process that provides WKW the ability to ship cutterheads in 7-10 working days. Customers are able to order one to many to fit their specific application. Delivery of those heads is within days not weeks. Head styles include Hydro-Loc, Quick-Loc™, Straight Bore, Axial Constant and Shaper.

FINGER JOINT TOOLING

Wisconsin Knife Works is proud to offer you the absolute best premium finger joint tooling on the market. Utilizing advanced manufacturing techniques, WKW has integrated leading-edge technology to produce finger joint cutters that will increase cutter accuracy, balance, offer tighter thickness tolerance, improve chip removal, and offer maximum strength in the cutter itself. Sizes range from 4 mm and 5 mm up to 7/8" and 1-1/8" in various materials to satisfy the most demanding applications.

WHY WKW?

Why? Because Wisconsin Knife Works has invested over 80 years of dedicated engineering expertise and advanced manufacturing techniques to produce premium quality cutting tools for thousands of applications. Our customers' needs are our highest priority. We fulfill those needs with innovation, quality products and ongoing service and support.

Call Wisconsin Knife Works for all your cutting tool needs – standard or custom – and receive premium quality cutting tools at a great value each and every time.
